ABOUT ME

Software Engineer focused on backend and full stack development, with hands-on experience in enterprise web applications, SaaS platforms and cloud-based solutions using C#, ASP.NET Core, Razor Pages, React, Node.js and SQL databases.

Contributed to university-level software projects, including an Information and Communication Security Guide automation system and a Summer Internship Management System. Experienced in backend development, relational database design, source control workflows and scalable software architecture.

Currently seeking software engineering roles where I can contribute to backend, full stack, cloud and DevOps-oriented product development.

SKILLS

Programming Languages

JavaScript / SQL / C# / TypeScript / Python

Frontend

React.js / HTML5 / CSS3 / Bootstrap / Tailwind CSS

Cloud & DevOps

AWS / CI/CD / GitHub Actions / Docker / Linux

Databases

PostgreSQL / MongoDB / MySQL / Microsoft SQL Server

Backend

ASP.NET Core / .NET 8 / Razor Pages / Entity Framework Core / Node.js / REST API

Microservices / DDD / ABP Framework / Clean Architecture / SOLID / Git / TFS/TFVC

WORK EXPERIENCE

Software Developer Intern

Konya Technical University – Information Technologies Department

02/2026 – 05/2026

Konya, Türkiye

- Developed an enterprise automation system for digitizing Information and Communication Security Guide processes using ASP.NET Core, Razor Pages and Microsoft SQL Server.
- Designed data models and management screens for information security control items, responsible departments, evaluation processes and reporting requirements.
- Collaborated with the software development team and administrative departments during requirements analysis, development, testing and maintenance processes.
- Used Team Foundation Server (TFS/TFVC) for source control and team-based development workflows.
- Received a Certificate of Appreciation from the Rectorate of Konya Technical University and a Reference Letter from the Information Technologies Department for contributions to university software projects.

Software Developer

Konya Technical University – İŞKUR Youth Program

10/2025 – 01/2026

Konya, Türkiye

- Worked as a Full Stack Developer on the Summer Internship Management System developed for use within the university.
- Developed a secure and modular software architecture using .NET 8, Razor Pages and MySQL.
- Contributed to the development of user management, workflow management and data management features.
- Took an active role in requirements analysis, development and testing processes.

IT Technician

Bima Bilgisayar

- Diagnosed and resolved hardware, software, operating system and network-related issues.
- Performed computer maintenance, repair, installation and upgrade operations.
- Provided technical support and product selection consultancy to customers.

11/2020 – 11/2022
Sanliurfa, Türkiye

PROJECTS

NexStock – SaaS Inventory & Account Management Platform

30/11/2025 –
Present

- Technologies: ASP.NET Core, ABP Framework, Razor Pages, Entity Framework Core, PostgreSQL.
- Developed a multi-module inventory and current account management platform for SMEs.
- Designed inventory, invoice, order, customer and current account management modules.
- Developed role-based authorization and reporting infrastructure.
- Built scalable database architecture and REST API infrastructure.
- Applied Clean Architecture and Domain-Driven Design principles.

AWS Cloud Resume Project

30/11/2024 –
Present

- Built and deployed a personal portfolio website on AWS.
- Configured Amazon S3 and CloudFront infrastructure.
- Created automated deployment workflows using GitHub Actions.

Riders – Social Media Application for Motorcycle Users

30/11/2024 –
Present

- Technologies: Flutter, Node.js, Express.js, MongoDB, Socket.IO, JWT.
- Implemented authentication and real-time messaging infrastructure.
- Developed location and route-sharing features.
- Designed REST API and MongoDB-based data structures.

EDUCATION AND TRAINING

Software Engineering

Konya Technical University

2022 – 2026
Konya, Türkiye

Computer Engineering

Atatürk University

2021 – 2022
Erzurum, Türkiye

VOLUNTEERING

Konya Technical Informatics Community

08/2024 – 08/2026
Konya

- Serve as a board member and coordinate the training team.
- Contribute to the planning and delivery of C programming, GNU/Linux and Git/GitHub training sessions.
- Organize technical orientation activities for new members.

Computer Informatics Club

08/2021 – 05/2022
Atatürk Üniversitesi

- Coordinated the training team and delivered C, Python and Git/GitHub training sessions.
- Took part in the planning and execution of technical events.

LANGUAGE SKILLS

Turkish

Mother tongue

English

Reading: B2 | Listening: B2 | Writing: B1 |
Speaking: B1
